TUFF KOTE SYSTEMS

INDUSTRIAL STRENGTH FLOORING

PARKING GARAGES

Tuff-Kote's Parking garage coating systems are designed to offer a durable, skid resistant surface while protecting concrete from moisture intrusion due to normal surface and shrinkage cracks. This waterproof coating system helps prevent the damaging effects of rebar corrosion due to the chloride-ion penetration. It is also impermeable to salt, water, and de-icing chemicals as well as all auto fluids.

Our parking garage joint systems will provide up to date solutions for larger expansion joints, joints with steel nosing, and joints with concrete nosing. The advantages are: Waterproof, Non-Extruding, Cost Efficient.

Dear Sir,

I would like to take this opportunity to introduce Tuff-Kote Systems. We are a construction company that specializes in the preparation and installation of Epoxy, Urethane, and many other Polymer composition floor systems as well as concrete sealers and color coatings.

These systems have a broad range of uses. They're highly chemical resistant and can withstand extremely abusive environments, plus permanently fix areas where concrete restoring is needed. Tuff-Kote systems will also help in on-site analysis and system specifications as well as architectural specifications to help you with you final selection process. It should be known that Tuff-Kote Systems is a solution oriented company that prides itself in quality and workmanship.

We would appreciate the opportunity to bid on any upcoming flooring projects or systems you may be considering. Please keep our company name and information on file and if you need a proposal call us to set up an on-site survey.

If you have any further questions or needed information please call us.

Sincerely,

Michael Peck
